

reLink the element Assets

- * When the project file open, Missing files window will pops up.
- * Press "Yes"

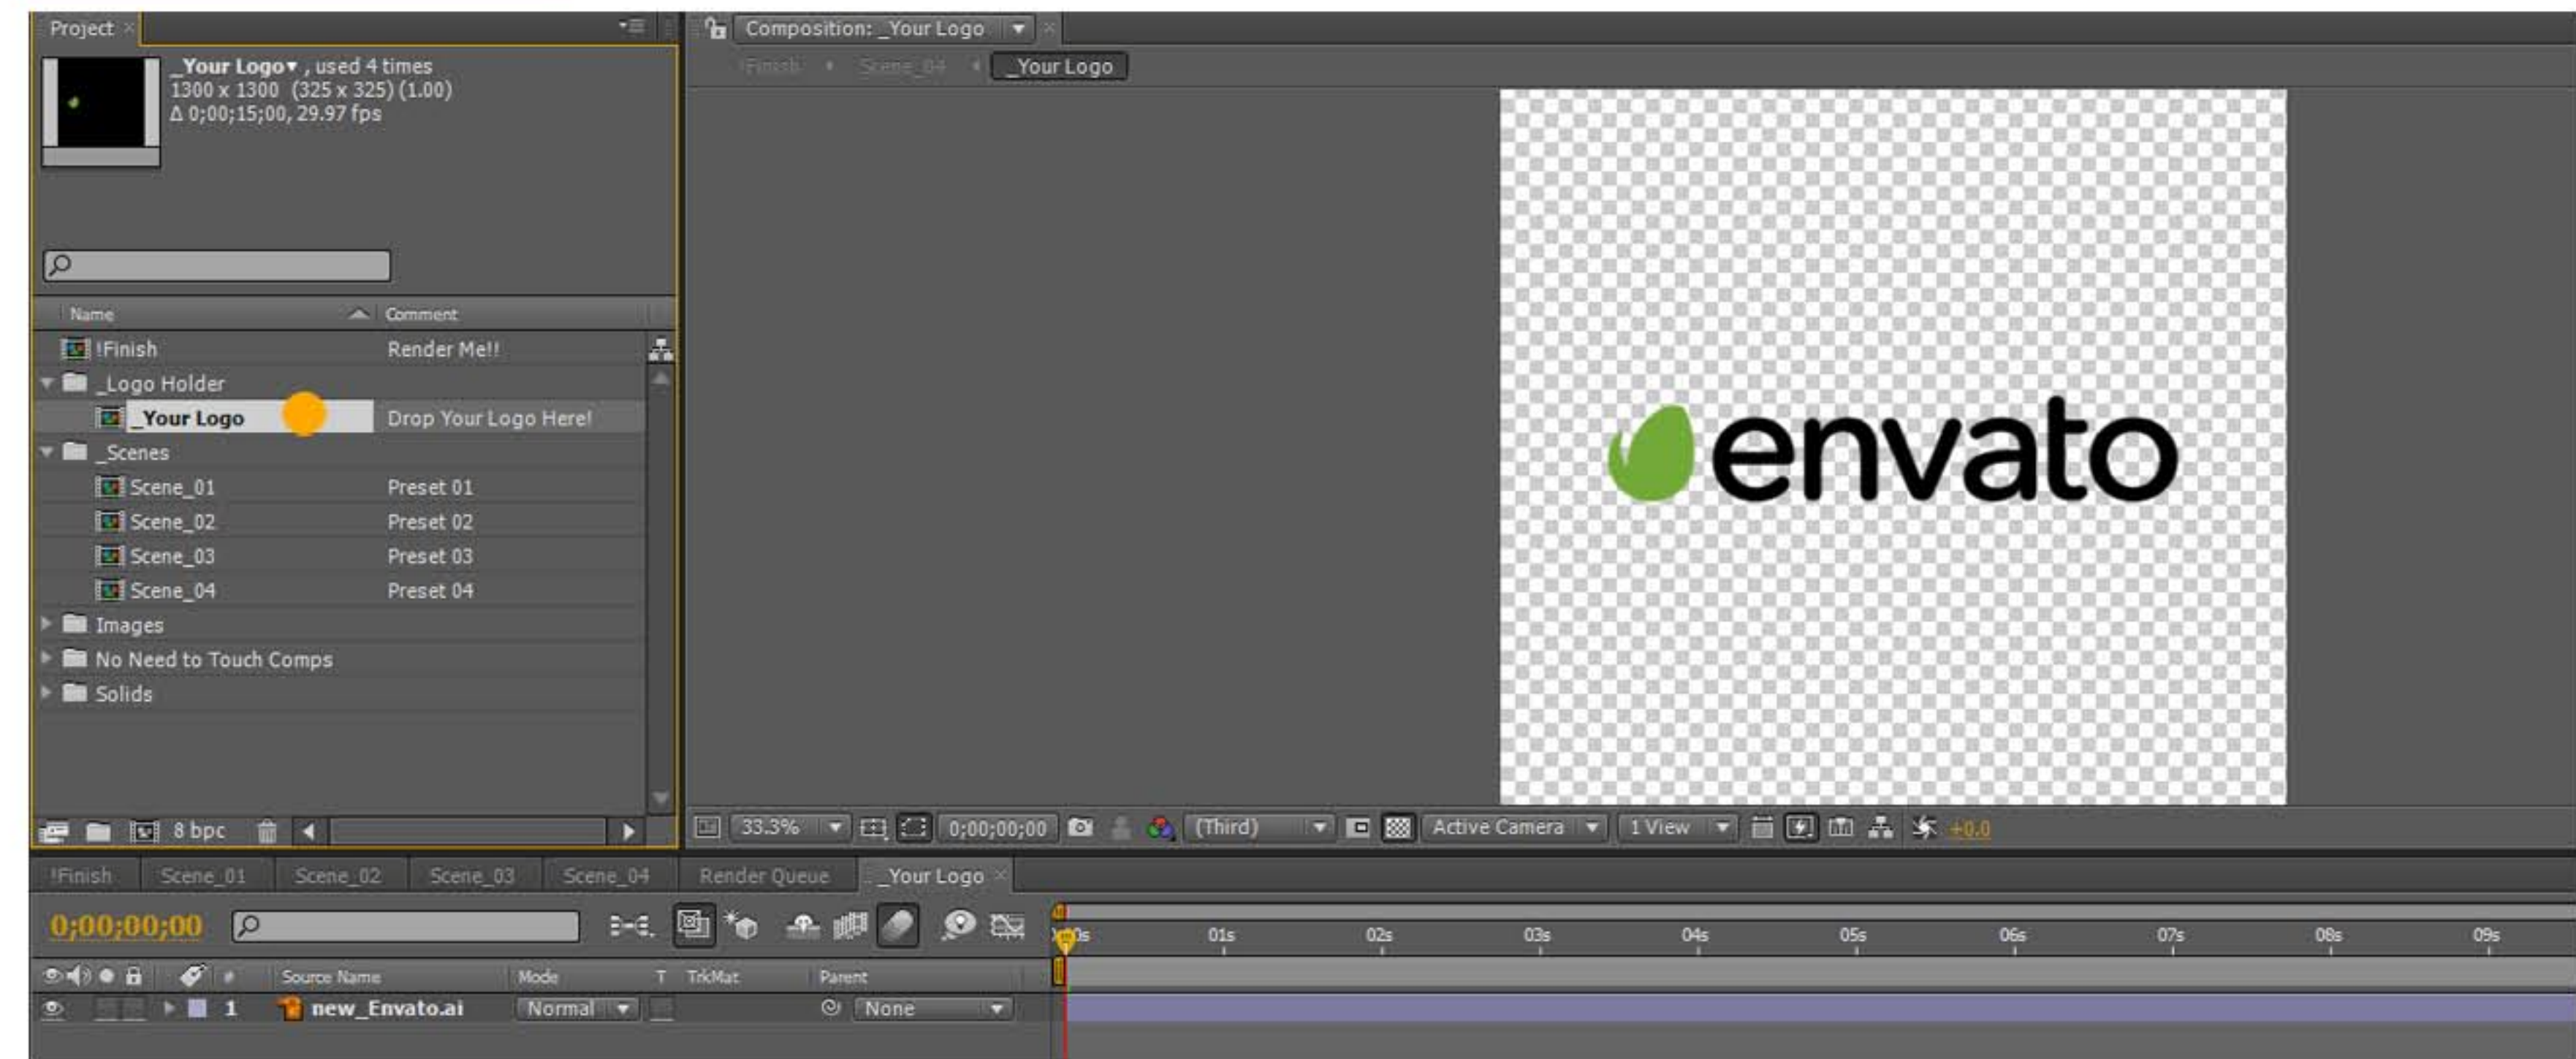

- * Press "Select Folder" button, and Set to "Element" folder in extracted folder
- * Press "Relink" button.
- * Press "OK" button.and close the window.

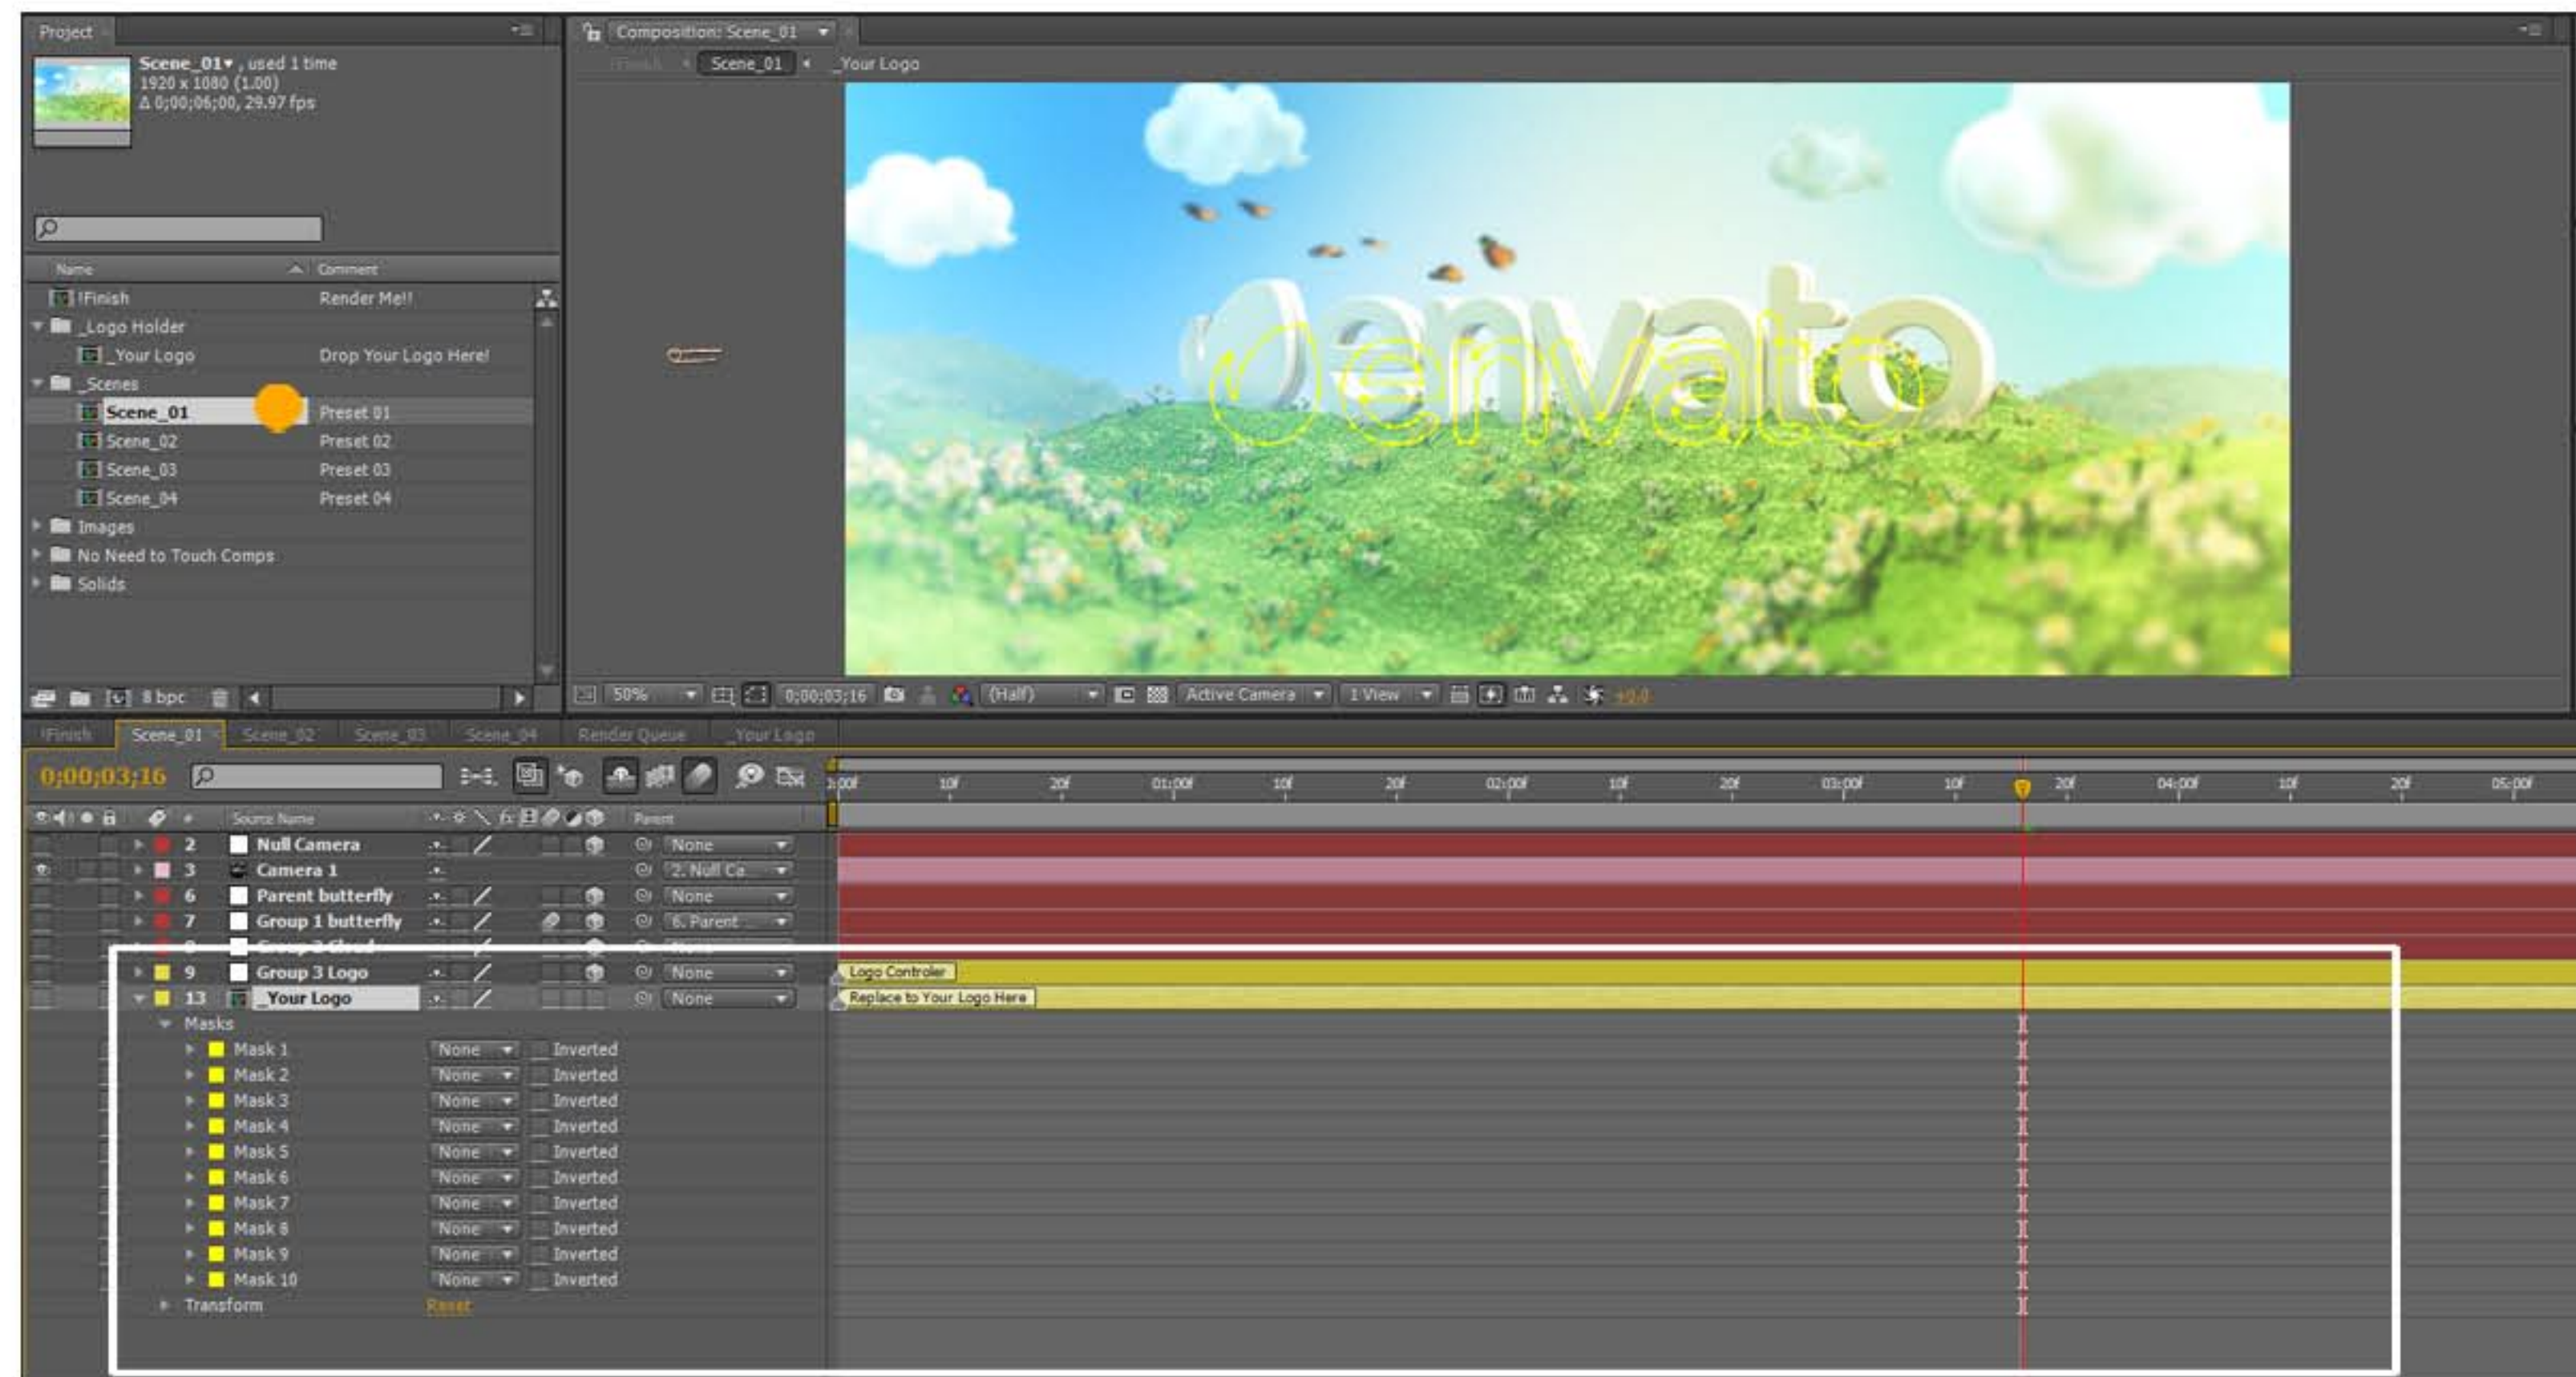

Folder Structure

- * Render this composition with all that done.
- * Logo Placeholder.
- * Choose the Preset Scene here.

How to use

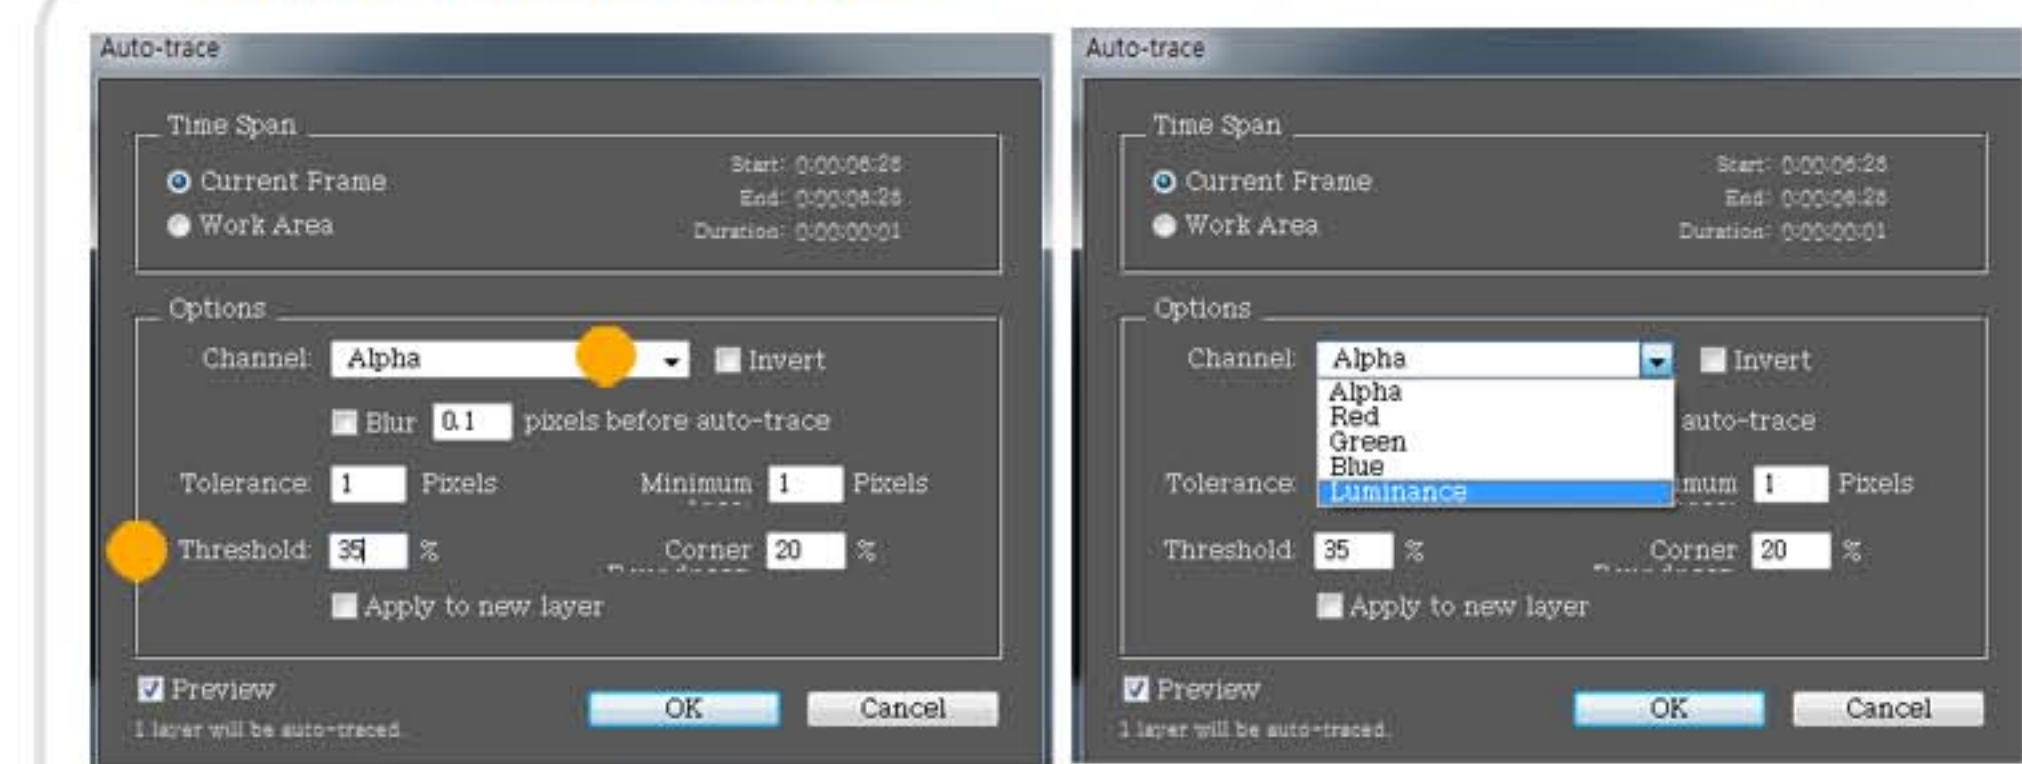

- * Go into the "_Your Logo" composition.
- * Replace to Your Logo (while holding alt or option). or write your text here.

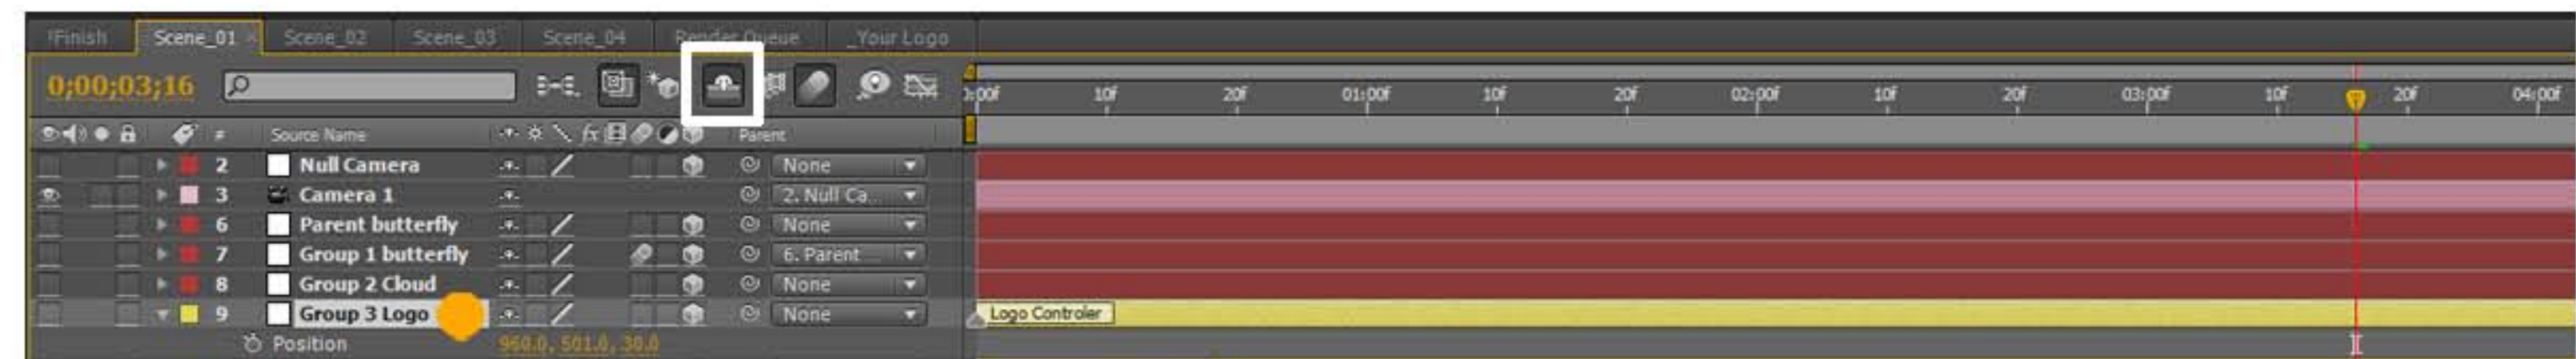

- * Go to the preset "Scene" composition you want.
- * Remove all masks on "_Your Logo" Layer.
- * Create Masks Using Layer - Auto trace menu.

How to use Auto-trace Menu

- * Set the channel drop-down menu to "Alpha", to make outline mask.
- Find the adaptive value on "Threshold"
- * Repeat "Auto-trace" menu to make inside detail.
- * then edit your masks simple and clean.

- * Fix the position,scale,rotation of Your Logo, Using "Group 3 Logo" Controler.
- * No need to change layers are hidden.

Finished. Set the work area on !Finish composition and Render!!
